

DISCLAIMER

Thank you for your inquiry and application for sponsorship to obtain the Amen Clinic brain SPECT imaging scan and assessment through our Magnify Hope Inc. foundation.

Our goal is to provide awareness and support to individuals and families living with schizophrenia or related brain health disorders on the schizophrenia spectrum.

We do this by offering financial assistance to help pay for the costs of the brain SPECT imaging scan for underserved minority young adults ages 18-30 years old.

Sponsorship applications are accepted as long as funds are available.

The final selection of qualified applicants is made by the healthcare coordinators at the Amen Clinic.

More information on the brain SPECT imaging scan, assessments, and treatment services can be found on their website at www.amenclinics.com.

Be it known, though unlikely, there is always the possibility that information via email and/or website may not be done through a secure platform. The information you include in your submission can be intercepted and read by parties other than the intended recipient. To protect your confidential information, please do not include personal identifying information such as your birth date or personal medical information in any emails or website submissions you send to us.
